Diego Marsetti is the owner of ECOGEOSRL company, with its headquarters in Bergamo where offices are located and ECOGEO PERU SAC in Lima, Peru.

Diego Marsetti provide his advice to various towns and companies in the surrounding area. Those agencies are now creating a lot of centres of really high quality linked to innovation, research and experimentation of new production processes.

A huge number of public authorities and private companies, from the little entrepreneur to medium-large enterprises, without excluding multinationals, turn themselves to **Diego Marsetti**. Groups which need really high-technology projects like, for example, the ones for water retrieval by well drilling, abatement of emissions, noise and atmosphere, purification plants, water, water saving and alternative energy sources, quarries, mines and landfills. Today, as well as working on the national grid/network, Diego Marsetti is present in working activities abroad: in America, in central Antilles, in Africa, in Indonesia, in Arabic Emirates, in Saudi Arabia, Russia, Peru and Malta.

Brief biographic profile

Born in Trescore Balneario (BG)in 1963, degreed at “Università degli Studi di Milano” in geological sciences in 1992, geologist and freelancer he is registered, since 1993, to the regional order of Lombardy’s geologists, he is today the owner of the company called “ECOGEOSRL”, with its headquarters in Bergamo. The group owns enterprise and Joint Venture in Peru, Malta, Saint Maarten, Dubai. He gained his experience during his working activities both in Italy and abroad, in particular in Africa, Centre America, Netherland Antilles, China, Mexico, Arabic Emirates, Russia, Canada, South America (Peru, Chile), Malta, Northern Europe in projects of supply and water prevention and in geology and engineering’s sectors. In 1998 he received the habilitation of expert in environmental matter. In 1999 he attained the rating for coordinating in matters of security and health. In 2003 he is recognised from Lombardy region as competent technician in environmental acoustics. He is a member of the national magazine “acque sotterranee” (groundwater) since 2008 and he is on the national scientific committee of “acque sotterranee, Italian Journal of groundwater” since January 2012. In May 2011 he is rapporteur at EXPO in Qatar Italian Design Creativity & Innovation” with theme “proposals for new

technologies in water research and treatment". He is vice-president of the Onlus association "orobicamente" UNESCO project "mura veneziane di città alta, Bergamo". During the year 2013-14 he is speaker in several conferences abroad at Mariott LW Hotel in Lima, Peru "New technologies in water purification and treatment" and "research techniques in the field of hydrogeology", speaker at the ministry of the environment in Tunis, Tunisia "waste water management in Tunis" speaker at the convention "31° Convencion Minera, PERUMIN" in Ariqupa, Peru "restoration and regeneration techniques for Lake Titicaca in the region of Puno, Peru. In December 2013 he received the title of geoenvironmental expert from the government of the region of Puno, in Peru. He is included into the international commission for the defence and protection for the requalification of lake Titicaca. In April 2014 he is speaker for the Ministry of Environment and Agriculture, National Water Authority (ANA) at the Seminar "Opciones tecnológicas para la protección de la calidad de los Recursos Hídricos" in Lima, Peru. In August 2014 he is rapporteur at the ministry of Bahrain "Consucting 3D surveys and mapping all utilities and integrated environmental technologies". He is vice-president at the UCID association (Unione Cristiana Imprenditori Dirigenti sezione di Bergamo). Since 2016 he is a member of the project "Skille Comuni ora NoiComune" service of formation and information for every city manager (Bergamo TV and L'Eco di Bergamo) on environmental geological issues. In September 2016 he is present at the EUROPEAN ARCHEOLOGY, EAA, MEETING 2016. ACADEMY OF CULTURAL HERITAGE for the presentation of the poster microbiological and environmental biomineralization - Hypogeum Hal Safleni, MALTA. In April 2017 he is inserted to the list of the authors who worked and studied the archeological site called "The Hal Safleni Hypogeum" UNESCO heritage, in Malta. In January 2019 he is nominated at the "senato della Repubblica" as environmental expert, technician adviser in the Environment and Territory Commission. He is member of in the Board of Directors of GML-AIM, Gruppo Mineralogico Lombardo, Associazione Italiana di Mineralogia. On the 14th and 15th of October 2019 he is speaker at PERU, Arequipa, Universidad Católica de Santa María en el II Congreso Internacional de Ingeniería Ambiental "Gestión ambiental, ecotecnologías y conservación de la biodiversidad". Escuela Profesional de Ingeniería Ambiental. N° 26814-R-2019. On the 27th of December of 2020 he receives with a Decree of the President of the Republic, the Honorary Officer of the Order of Merit of the Italian Republic. Since 2022 he has been a consultant on environmental and geological issues at the Government of the Republic of San Marino. In January 2022 he joined UNIDO, (United Nations Industrial Development Organization) as a specialist water consultant. From 12.05.2022 he is President of the UCID association of Bergamo. He is the author of several scientific publications in the field of hydrogeology, biochemical corrosion, geology-geotechnics and environment and speaker at various national and international conferences.

ECOGEO is a structure of environmental services and projection formed by geologists, engineers, architects, chemistries and informatics born in the '70s, with a range of different experiences from the engineer field to the earth science ones. For the conduct of its business it takes advantage of qualified external technicians, members of different disciplines: biologists, pedologists, agronomists, electronics experts, physicists, surveyors, naturalists.

ECOGEO operates with working groups, organised each time to satisfy the client's specific needs. Ecogeo's principal activities are: the projection, studies and consultancies in geological, engineering and architectural, hydrogeological, chemical-mining, ecological-environmental, corrosion protection, water treatment, technological networks (aqueducts and sewerage), purification plants, environmental acoustics surveys, atmospheric emissions and topographical surveys, applied informatics, safety and environmental hygiene fields. It has internally laboratory of physico-physical and geotechnical chemistry analysis which form the base supports for Ecogeo group's activity. The society also provides professional performances in outsourcing. It is a familiar management born thanks to the really high scientific and qualified preparation and experience of the engineer Marsetti René, Diego Marsetti's father, to whom his son must have a deep recognition for the passion and professionalism that he managed to transmit him.

ECOGEO was born in 1992, in particular on the 3rd of January 1992, with the name "studio professionale Ecogeo di Marsetti dott. Diego", still in activity. At the beginning of its activity, Ecogeo in 1992 constitutes with professional activities with advanced experience in what happens, in lateral continuity with the existing and operating company "A:PASINETTI" founded in 1969. From 1992 to 2003 Ecogeo of Marsetti dott.Diego is principally involved in geological, ecologic and of environmental protection activities. In 2001 due to the need to found another business of the Ecogeo group which could answer to architecture's market questions: ARCOAMBIENTE, Marsetti arch.Stefania's office was born. All along its activities, Ecogeo pointed out its total function and professionalism demonstrated by the growing trend of its turnover and customers. The limited liability company "ECOGEO SRL" was born on 11.06.2003, leader today of the "Ecogeo Group" which answers to market questions in the field of geology and integrated engineering. On 12.08.2003 ECOGEO company registered its own brand at number BG2003c0000188 "ECOGEO" and in December 2006 it is certificated by the Quality Management System now UNI EN ISO 9001:2008. In November 2010 the laboratory is credited to number 1399 and it operates in accordance with the rule UNI CEI EN ISO/IEC 17025:2005. In December 2018

the company obtained the certifications of the Safety Management System OHSAS 18001 and for the Environment UNI EN ISO 14001.

Having its headquarters in Bergamo, **ECOGEO** offers his advice to several towns and companies in the surrounding area. Those agencies are creating high quality centres linked to innovation, research and to the experimentation of new production processes. The company worked on the national grid/network for more than 1200 cities realising studies and designs in since it was born with the name "Pasinetti" in the fields of geology, engineering and environment.

Ecogeo srl, Italy

On behalf of the European Association of Archaeologists and the Academy of Cultural Heritage, we are pleased to officially confirm your participation at the 22nd Annual Meeting of European Association of Archaeologists and presentation of paper "**Microbiological and environmental biomineralization**". The meeting was scheduled for August 31 - September 4, 2016 and held at Vilnius University, Universiteto St. 7, Vilnius, Lithuania.

The purpose of this 5-day Annual Meeting was to provide a natural forum for the exploration and application of emerging theoretical and methodological trends in archaeology and to present cutting edge advances and research-led results from archaeological and heritage projects within and beyond Europe. It also provided a good opportunity for scholars from different countries to meet and discuss tendencies and future prospects of archaeology, review former projects and plans for the future, and present new technologies.

Should you require more information about the Meeting, please contact us at info@eaavilnius2016.lt.

Sincerely,

Agnė Žilinskaite
